

Heavy Duty Forklift Wheel

This heavy-duty forklift wheel is engineered for durability and optimal performance in industrial environments. Constructed from high-quality materials, it is designed to withstand heavy loads and provide reliable operation.

Product Overview

Industrial Grade Performance

This heavy-duty forklift wheel is engineered for high-performance industrial environments where reliability and durability are paramount. Constructed from high-quality materials, it is specifically designed to withstand significant load-bearing demands while maintaining operational stability. The robust design includes multiple bolt holes to ensure a secure, safe mounting for a wide variety of forklift models.

Technical Specifications

Key Features

Heavy Duty Construction • Industrial Grade • High Load Capacity

Category	Auto Parts, Aftermarket Service, Material Handling
Mounting Configuration	Multi-bolt hole pattern
