

Heavy Duty Gas Engine Oil for CNG/LNG Engines

This engine oil is suitable for spark ignition lean burn engines powered by CNG and LNG. It provides excellent lubrication protection for heavy-duty vehicles with gas and dual fuel engines.

Product Overview

High-Performance Gas Engine Lubrication

This specialized engine oil is formulated specifically for heavy-duty CNG and LNG engines. Its low to medium ash formulation is engineered to significantly reduce sediment accumulation, thereby preventing premature wear on critical engine components. By maintaining engine cleanliness and reducing friction, this lubricant helps sustain optimal power output and extends the service life of heavy-duty gas engines.

Technical Specifications

Available Packaging Sizes

- 4L
- 16L
- 18L

Available Viscosity Grades

15W/40, 20W/50

Performance Features

Performance Highlights

Low Ash Content • Anti-Wear Protection • Improved Power Output • Sediment Reduction

Engine Compatibility

Heavy-duty CNG and LNG engines
