

Heavy Duty Gas Engine Oil

This engine oil is suitable for spark ignition lean burn engines with CNG and LNG as fuel. It provides lubrication protection for heavy duty trucks, luxury buses and buses equipped with gas and dual fuel engines.

Product Overview

High-Performance Gas Engine Lubrication

This heavy-duty gas engine oil is engineered with advanced low-ash technology to minimize deposit formation and prevent abnormal wear. Designed to withstand harsh working conditions, it enhances engine power and provides superior heat load resistance. Its robust oil film performance ensures lasting protection for gas-powered engines, maintaining optimal operation under extreme stress.

Technical Specifications

Container Sizes

- 4 Liters
- 18 Liters

Available Viscosity Grades

15W/40, 20W/50

Performance Features

Performance Benefits

Low Ash Content • Anti-Wear Protection • Enhanced Power Output • Heat Load Resistance

Application

Gas-powered engines
