

Heavy-Duty Grapple Attachment

This grapple is designed for heavy-duty applications involving gripping and lifting. It has a height of approximately 1500 ± 50 mm and a width ranging from 1000 to 1500 mm.

Product Overview

Heavy-Duty Grapple Attachment

This heavy-duty grapple attachment is engineered for demanding forestry and construction applications. Designed for efficient gripping and lifting, it features robust hydraulic components to ensure reliability in challenging work environments. With adjustable dimensions, it provides the versatility needed for various material handling tasks.

Dimensions

Height	1500 mm
Height Tolerance	50 mm
Width Range	1000–1500 mm

Technical Specifications

Primary Applications

Forestry • Construction • Material Handling

Design Features

- Heavy-duty construction
- Hydraulic operation
- Yellow and black high-visibility finish

Model Identifiers	560C, 90M
