

Heavy-Duty Hydraulic Claw Jack

Heavy-duty claw jacks are designed for lifting heavy machinery and equipment in various industrial applications. The claw design allows for lifting from a low clearance point, while the adjustable height provides versatility.

Product Overview

Heavy-Duty Hydraulic Claw Jack

This heavy-duty hydraulic claw jack is designed for lifting heavy machinery and equipment in demanding industrial environments. Featuring a robust steel frame construction and a versatile hydraulic mechanism, it allows for lifting from both the top and the claw, making it ideal for low-clearance applications. Built for high reliability and low maintenance, this tool is an essential asset for construction, manufacturing, and maintenance operations.
