

Heavy-Duty Impact Drill for Concrete Masonry

This professional-grade impact drill is designed for heavy-duty applications. It features a robust motor for high power and torque and is ideal for drilling into concrete, masonry, wood, and metal.

Product Overview

Professional-Grade Performance

This heavy-duty impact drill is engineered for demanding construction and masonry applications. It features a robust motor designed to deliver high power and torque, ensuring efficient performance across concrete, masonry, wood, and metal. With variable speed control and an ergonomic design including an auxiliary handle, it provides the precision and comfort required for extended professional use.

Technical Specifications

Control Features

- Variable speed control
- Auxiliary handle for stability

Build Quality

Heavy-duty construction • High torque output

Applications

Concrete, Masonry, Wood, Metal
