

Heavy-Duty Industrial Power Socket

This is a heavy-duty industrial power socket designed for high-current applications. It features a robust construction and a hinged cover to protect from dust and moisture.

Product Overview

Industrial Power Solution

The Heavy-Duty Industrial Power Socket is engineered for high-current applications in demanding environments. It features a robust, durable construction built to withstand the rigors of construction sites and industrial facilities. The unit includes a protective hinged cover to ensure safety by shielding against dust and moisture during periods of non-use.

Physical Properties

Protection Features

Dust-resistant, Moisture-resistant, Heavy-duty construction, Hinged safety cover

Technical Specifications

Connection Type

Multi-pin configuration for electrical phases, neutral, and ground

Application

Primary Applications

- Industrial machinery
- Construction sites
- Heavy-duty electrical infrastructure
