

Heavy-Duty Industrial Staples

These industrial-grade staples are designed for heavy-duty staplers. They are constructed from high-tensile steel for reliable fastening and reduced bending.

Product Overview

Industrial-Grade Fastening Solution

These heavy-duty industrial staples are engineered from high-tensile steel to provide reliable, consistent performance in high-volume environments. Designed for superior penetration, they feature a precision chisel point that effortlessly pierces materials such as cardboard, fabric, and paper. Their robust construction minimizes bending, ensuring secure fastening for demanding industrial applications.

Technical Specifications

Compatible Materials

- Paper
- Cardboard
- Fabric

Material	High-tensile steel
Key Features	Chisel point, High-tensile strength, Anti-bend design

Application

Use Case Suitability

Heavy-duty stapling • High-volume environments
