

Heavy-Duty Internal Combustion Engine

This is a high-performance auto engine with a robust design. It features multiple cylinders, intricate fuel lines, and a large cooling fan.

Overview

Heavy-Duty Internal Combustion Engine

This high-performance internal combustion engine is engineered for demanding heavy-duty applications. Featuring a robust construction, it includes integrated components such as a large cooling fan, starter motor, electrical control units, and advanced fuel lines. Its durable design ensures reliable operation in intensive industrial or automotive environments.

Technical Specifications

Application

Heavy-Duty • Industrial • Automotive

Engine Type

Internal Combustion

Model Identifier

03325

Key Features

Included Components

- Large cooling fan
- Starter motor
- Electrical control units
- Fuel lines
- Filters
