

Heavy Duty Lifting Block

This heavy-duty lifting block is designed for lifting and lowering heavy loads in industrial applications. It features robust construction with multiple sheaves for increased lifting capacity and reduced cable wear.

Product Overview

Industrial Heavy Duty Lifting Block

This heavy-duty traveling block is engineered for demanding industrial lifting and lowering operations. It features a robust design with multiple sheaves to enhance lifting capacity while minimizing cable fatigue and wear. With integrated safety locking mechanisms and durable protective housing, it provides reliable performance in high-stakes environments such as oil rigs and heavy-duty crane systems.

Technical Specifications

Safety Features

- Integrated locking mechanism
- Durable heavy-duty housing
- Multi-sheave configuration for reduced wear

Construction

Heavy-Duty • Multi-Sheave

Application Fields

Oil Rigs, Cranes, Heavy Lifting Equipment
