

Heavy Duty Machinery Moving Skates

These heavy-duty skates facilitate the movement of heavy machinery and equipment. Featuring a rotating platform and multiple rollers, they ensure smooth and efficient movement.

Product Overview

Heavy Duty Machinery Moving Skates

These heavy-duty load skates are engineered for the efficient transport of heavy machinery and industrial equipment. Featuring a robust construction with multiple rollers, they ensure smooth and reliable movement across factory and warehouse floors. Each unit is equipped with a rotating platform, allowing for precise positioning and steering during complex relocation tasks.

Technical Specifications

Durability

Industrial Grade • Tested for Heavy Loads

Key Design Features

- Robust multi-roller construction
- Rotating platform for steering
- High load capacity design

Ideal Applications

Factories, Warehouses, Construction Sites

Performance Metrics

Performance Highlights

20 Years

Manufacturing Experience
