

Heavy-Duty Machinery Roller

This heavy-duty machinery roller facilitates the movement of heavy loads and equipment. Its robust steel build includes a swivel top plate and multiple mounting holes for secure machinery attachment.

Product Overview

Heavy-Duty Machinery Roller

This heavy-duty machinery roller is designed to significantly reduce the physical effort required to transport heavy loads and equipment. Built for versatility, it features a robust construction suitable for factory workshops, construction sites, and large-scale warehouse environments. The unit offers exceptional maneuverability, allowing for precise positioning and 360-degree rotation to navigate tight spaces effectively.

Technical Capabilities

Maneuverability

- 360-degree rotation capability
- 270-degree front wheel angle adjustment
- Swivel top plate for precise positioning

Ideal Applications

Factory Workshops, Construction Sites, Large Supermarkets, Warehousing

Construction

Construction Material

Robust steel construction

Mounting Features

Yes
