

# Heavy-Duty Machinery Steering Gearbox

This robust engineering machinery component is a steering mechanism or gearbox designed for heavy-duty applications. The unit features a cast metal housing, providing durability and protection for internal components.

## Product Overview

### Heavy-Duty Steering Gearbox

This heavy-duty steering gearbox is engineered for demanding industrial and engineering machinery applications. Featuring a robust cast metal housing with a corrosion-resistant black finish, this unit is built to withstand rigorous operational environments. It includes multiple integrated shafts and mounting points, ensuring seamless compatibility and reliable performance within complex mechanical steering systems.

## Technical Identification

Part Number	4AX-1113
Serial Number	UAB 1JJJ00011

## Construction

Housing Material	Cast Metal
Finish	Corrosion-resistant black finish
Key Design Features	Heavy-duty application, Multi-shaft integration, Corrosion resistant
