

Heavy Duty Machinery Transport Dollies

These heavy-duty transport dollies are designed for moving large and heavy machinery with ease. The dollies feature a robust construction with multiple rollers for smooth and efficient movement.

Product Overview

Heavy Duty Machinery Transport Solution

These heavy-duty machinery transport dollies are specifically engineered for the efficient and safe movement of large, industrial equipment. Designed for high capacity and reliable performance, they feature a robust steel construction with multiple rollers to ensure smooth mobility across workshop or factory floors. By utilizing three or more units in coordination, these dollies can accommodate machines of various shapes and sizes, making them a versatile tool for heavy equipment logistics.

Performance

Operational Flexibility

Adjustable directional movement capability

Design

Surface Finish

Corrosion Resistant • Industrial Red Paint

Key Construction Features

- Heavy-duty steel frame
- Multiple high-load roller configuration
- Load-bearing platform
- Manual directional handling
