

Heavy-Duty Manual Locking Device

This heavy-duty locking device features a robust rectangular body and a hand crank for manual operation. It incorporates a spring-loaded mechanism and pivoting end with a circular fitting for secure applications.

Product Overview

Robust Manual Locking Solution

This heavy-duty manual locking device is engineered for demanding industrial environments where reliability is paramount. It features a robust rectangular body equipped with a user-friendly hand crank for precise manual operation. Designed for secure locking applications, the unit incorporates a spring-loaded mechanism and a pivoting end with a circular fitting to ensure consistent performance and longevity.

Technical Features

Mechanism Components

- Spring-loaded locking assembly
- Pivoting end fitting
- Circular mounting interface

Construction

Heavy-Duty • Durable Materials • Industrial Grade

Operation Type

Manual with hand crank
