

Heavy-Duty Material Lifting Crane

This heavy-duty crane is designed for lifting and moving heavy loads. It is suitable for construction sites, industrial facilities, and infrastructure projects.

Product Overview

Heavy-Duty Material Lifting Crane

This heavy-duty elevator crane is engineered for demanding lifting and material handling tasks in construction and industrial environments. It features a robust telescopic boom and a multi-reeved hoisting system, ensuring precise control and stability during operation. With its stable tracked chassis and fully enclosed operator cabin, this equipment provides both maneuverability on varied terrains and a safe, comfortable working environment for operators.

Technical Specifications

Model Identifier	SR-1000
Key Construction Features	Telescopic Boom, Multi-reeved Hoisting System, Tracked Chassis, Enclosed Cabin

Operational Capabilities

Primary Applications

- Construction sites
- Industrial facilities
- Infrastructure projects
- Material and equipment lifting

Safety Features

Fully Enclosed Cabin • Stable Chassis • Precise Control
