Product Overview

Precision Heavy-Duty Lathe C6256x1500

The C6256x1500 is a high-performance, heavy-duty metalworking lathe engineered for demanding manufacturing, repair, and maintenance applications. Featuring a high-rigidity spindle system and a precision-ground gear train, this machine ensures exceptional stability, minimal vibration, and smooth operation. It is fully equipped for versatile turning tasks including facing, threading, and boring, backed by professional tolerance test documentation.

Technical Specifications

Primary Capabilities

- Powerful headstock gear train
- Low noise operation
- Variable speed and feed control
- Threading capabilities
- Integrated coolant system

Model Number	C6256x1500
Build Quality	Hardened Guideways, Precision Ground Gears, High Rigidity Spindle

Safety and Compliance

Safety Equipment

- Emergency stop button
- Protective covers
- CE Compliant

Braking Mechanism	Pedal or electromagnetic braking
--------------------------	----------------------------------

Documentation

Included Documents

- Tolerance test certificate
- Test flow chart
