

Heavy-Duty Mining Dump Truck

This heavy-duty mining truck is designed for transporting large quantities of materials in mining and construction environments. It features a robust chassis, powerful engine, and high payload capacity.

Overview

Heavy-Duty Mining Dump Truck

This heavy-duty mining dump truck is engineered specifically for the rigorous demands of large-scale material transport in mining and construction environments. It features a robust chassis and a powerful engine designed to maintain performance and reliability under harsh operating conditions. With its high payload capacity, this vehicle is an essential asset for maximizing efficiency and productivity in demanding industrial applications.

Key Metrics

Performance Highlights

30 tons

Payload Capacity

Model Identifier	SGR30
------------------	-------

Design & Construction

Build Features

- Robust chassis construction
- High-performance engine
- Engineered for harsh operating conditions

Suitable Environments	Mining, Construction, Heavy-Duty Transport
-----------------------	--
