

Heavy-Duty Motorcycle Drive Chain

This high-performance motorcycle chain is designed for heavy-duty applications. It is constructed with precision-engineered components to ensure optimal strength, durability, and reliability.

Product Overview

High-Performance Drive Chain

This heavy-duty motorcycle drive chain is engineered for demanding applications, offering superior strength and reliability. Constructed with precision-engineered components, including hardened steel rollers and bushings, it is designed to withstand rigorous riding conditions while providing an extended wear life. The chain comes pre-lubricated to minimize friction, ensuring smooth operation and efficient power transfer for a wide range of motorcycle models.

Technical Specifications

Model Designation	428H-P
Branding Mark	TRIDENT

Features

Key Features	Heavy-Duty, Hardened Steel Rollers, Pre-lubricated, High Durability
--------------	---
