

Heavy Duty Moving Skates with Rotating Platform

These heavy-duty moving skates are designed for transporting heavy loads. They feature a durable steel frame with a rotating platform and smooth-rolling casters for easy maneuvering.

Product Overview

Heavy-Duty Industrial Moving Solution

These heavy-duty moving skates are designed for the efficient transport of large machinery and equipment in industrial settings. Featuring a robust steel frame and a highly maneuverable rotating platform, they allow for precise positioning of heavy loads. The front wheels offer a 280-degree steering range, providing the flexibility needed to navigate tight spaces and reach specific locations with ease.

Technical Specifications

Load Capacity

12 T

Capacity

Maneuverability Features

- Rotating platform for directional changes
- Steerable front wheels
- Smooth roller movement

Steering Range

280 degrees

Applications

Ideal For

Heavy Machinery Transport, Industrial Equipment Moving, Warehouse Logistics
