

Heavy-Duty Multi-Axle Semi-Trailer for Container Transport

This semi-trailer is a heavy-duty transport solution designed for hauling containers and other large loads. It is constructed with a robust steel frame, offering exceptional durability and stability.

Product Overview

Heavy-Duty Container Transport Solution

The BYF9360 semi-trailer is a heavy-duty transport solution engineered for hauling containers and large cargo with maximum stability. Built on a robust steel frame, this unit is designed to withstand the rigors of demanding logistics environments. It features a multi-axle configuration for superior weight distribution and includes integrated container locking mechanisms to ensure secure transit for various container sizes.

Technical Specifications

Compatibility

- Adjustable gooseneck
- Universal tractor unit compatibility

Frame Material	Robust Steel
Container Compatibility	Standard Locking, Multi-size Support
Axle Configuration	Multi-axle
