Product Overview

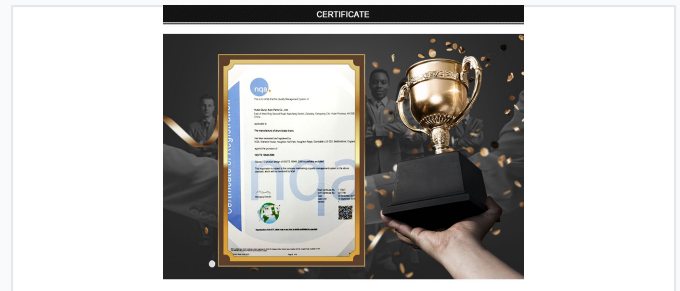

High-Performance Brake Solutions

Engineered for heavy-duty commercial vehicles, buses, trucks, and trailers, these non-asbestos brake shoe linings deliver exceptional stopping power and reliability. Designed to withstand the toughest road conditions, the friction material ensures a long service life while maintaining quiet operation and low dust levels. Every unit is manufactured under strict quality control standards to ensure safety, durability, and consistent performance.

Key Features

Key performance features including high temperature resistance and abrasion durability.

Quality management system certification ensuring adherence to international manufacturing standards.

Compliance

ISO/TS 16949 Certified • Environmentally Friendly

Performance Advantages

Noiseless Operation, 100% Asbestos-Free, High Temperature Resistant, High Abrasion Resistance, Brake Sensitive, Drum-Friendly

Logistics & Ordering

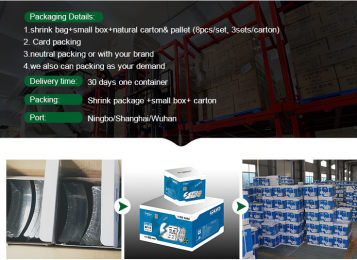

PACKAGING AND DELIVERY

Packaging Details:
1. Shrink bag+small box+natural carton& pallet (1ppcs/set, 3sets/Carton)
2. Card packing
3. Neutral packing or with your brand
4. We also can packing as your demand

Delivery time: 30 days one container

Packing: Shrink package+small box+ carton

Port: Ningbo/Shanghai/Wuhan

Standardized packaging options and delivery logistics for heavy-duty brake parts.
