

Heavy-Duty Rear Axle Assembly for Construction Machinery

This heavy-duty rear axle assembly is designed for loaders, excavators, and bulldozers. The robust axle features a rigid beam construction, providing exceptional strength and durability for demanding construction applications.

Product Overview

Heavy-Duty Rear Axle Assembly

This heavy-duty rear axle assembly is engineered specifically for demanding construction machinery including loaders, excavators, and bulldozers. Featuring a rigid beam construction, it offers exceptional strength and durability to withstand rigorous job site conditions. The assembly comes fully equipped with integrated brake drums and necessary hardware to ensure reliable stopping power and consistent performance under load.

Technical Specifications

Compatible Machinery	Loaders, Excavators, Bulldozers
Construction Type	Rigid beam construction
Braking System	Integrated brake drums

Key Features

Performance Highlights

1 Optimized
Load Distribution

1 Included
Suspension Mounting

Ideal Use Cases

- Replacement parts
- New construction projects
- High-performance heavy-duty applications
