

Heavy-Duty Rebar Bending Machine

This heavy-duty machine is designed for bending rebar in demanding environments. It features a maintenance-free spindle, enclosed electric cabinet, and double-sided operation for enhanced productivity.

Product Overview

Industrial Rebar Bending Solution

This heavy-duty rebar bending machine is engineered for precision and durability in professional construction environments. It features a maintenance-free spindle and an upgraded heavy-duty gear box assembly, ensuring reliable performance under continuous load. With an enclosed electric cabinet and robust steel construction, it offers superior protection against moisture and dust while maintaining accuracy across various bar diameters.

Key Features

Advantages

- Maintenance-free spindle system
- Double-sided operation for increased efficiency
- Enclosed electric cabinet for moisture and dust protection
- High-quality alloy steel column and spool
- Rotary oil-way for convenient maintenance

Performance

Technical Specifications

Model	Plain Bar (Imm)
JN/GW40	6-40
JN/GW45	3-45
JN/GW50	6-50
JN/GW55	6-55

Motor Power

3 kw

Motor Output
