Overview

Heavy Duty Revolution Door Floor Spring

The HD-95 is a high-capacity, heavy-duty floor spring engineered for demanding commercial and industrial environments. It features a robust, slim square box design that accommodates glass, wooden, aluminum, and frame doors with ease. Built for longevity, this unit offers corrosion and low-temperature resistance, along with an oil leak-proof construction to ensure reliable operation in high-traffic areas.

Technical Specifications

Detailed dimensional view for installation planning.

Capacity Metrics

1600 mm

Max Door Width

450 kg

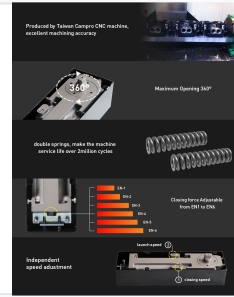

Max Door Weight

Physical Dimensions	357mm x 100mm x 72.5mm
Closing Force Range	EN1 to EN6 (Adjustable)
Stop Device Angles	90°, 135°
Maximum Opening Degree	360 °

Performance & Durability

Built for longevity with corrosion and low-temperature resistance.

Highlighting the adjustable EN1-EN6 closing force and high cycle life.

Key Durability Features

Corrosion Resistant • Low-Temperature Resistant • Wear-Resisting • Oil Leak-Proof

Adjustment Capabilities

- Double speed adjustment
- Independent launch and closing speed control

Cycle Test Performance

Over 2,000,000 cycles

Compliance & Compatibility

Compatible Door Types

- Glass Door
- Wooden Door
- Aluminum Door
- Frame Door

Standards & Compliance

UL Listed, ISO9001, EN1154
