Product Overview

Durable Utility Performance

This heavy-duty inflatable rubber wheel is engineered for reliability in demanding environments such as gardening and landscaping. Featuring a robust construction with an optimized tread pattern, it provides superior grip and stability across various surfaces. It is designed specifically for use on carts, trolleys, and gardening vehicles, ensuring smooth operation and long-lasting durability.

Technical Specifications

Performance Ratings

136 kg

Maximum Load

30 PSI

Max Pressure

Wheel Dimensions

10 x 3.50-4

Safety and Usage

Usage Restrictions

Not for highway use, No high-speed use, Maintain 30 PSI cold

Application

Recommended Applications

- Flower gardening vehicles
- Forestry carts
- General utility trolleys
