

# Heavy-Duty Sewing Machine with Adjustable Stitch Options

This heavy-duty sewing machine is designed for various sewing tasks, equipped with a robust motor to manage thick fabrics and multiple layers. It features adjustable stitch length and width, enabling stitch customization, and incorporates a reverse sewing function for seam reinforcement.

## Overview

### Built for Heavy-Duty Performance

This heavy-duty sewing machine is engineered as a true workhorse, featuring a robust metal interior frame and a stainless steel bedplate for maximum durability. Designed to handle thick fabrics and multiple layers with ease, it combines a powerful motor with extra-high sewing speeds. Convenience features like an automatic needle threader and top drop-in bobbin ensure efficiency for professional and intensive sewing projects.

## Key Features

### Core Capabilities

Heavy-duty metal frame, Stainless steel bedplate, Automatic needle threader, Top drop-in bobbin, 1-step buttonhole, Drop feed for free motion

## Performance

### Sewing Speed

Extra-high speed

## Functionality

### Stitch Versatility
