

Heavy Duty Sledge Hammer

This sledge hammer is designed for demolition, driving stakes, and breaking concrete. It features a forged steel head for maximum impact force and enhanced durability.

Product Overview

Built for Demolition

This heavy-duty sledge hammer is engineered for high-impact tasks including demolition, driving stakes, and breaking concrete. It features a forged steel head designed for maximum durability and force. The ergonomic fiberglass handle is constructed to absorb shock, significantly reducing user fatigue during prolonged operation.

Technical Specifications

Head Material	Forged Steel
Handle Material	Fiberglass
Key Features	Shock-absorbing, High-impact, Durable

Applications

Primary Uses

- Demolition
- Driving stakes
- Breaking concrete
- Construction
- Landscaping
