

# Heavy Duty Solid Rubber Tires for Trucks and Trailers

These heavy-duty solid rubber tires are designed for use on trucks and trailers. Their solid construction eliminates the risk of flats, offering exceptional durability.

## Product Overview

Heavy-duty solid rubber tire designed for industrial trucks and trailers.

### Heavy-Duty Solid Rubber Tires

Engineered for demanding industrial environments, these solid rubber tires are designed for heavy-duty trucks, trailers, and construction machinery. The advanced 3-stage compound design ensures exceptional load-bearing capacity, wear resistance, and minimal heat build-up. By eliminating the risk of punctures and flats, these tires provide a maintenance-free solution that significantly reduces operating costs and downtime in ports, steel mills, and off-road applications.

## Technical Specifications

Engineered for superior durability and performance in demanding industrial applications.

Solid construction eliminates downtime caused by punctures.

### Key Features

- 3-stage compound design
- High-load capacity rubber compound
- Low heat build-up base formula
- Puncture-resistant solid construction
- Wear-resistant tread

### Load & Performance Data

Size	Rim	Max Load (10km/h)	Max Load (25km/h)
9.00-20	7.00	6160	5400
10.00-20	8.00	7300	6200
11.00-20	8.00	7715	6540

### Available Sizes

9.00-20, 10.00-20, 11.00-20

## Compliance & Quality

### Certifications

ISO9001 • ISO14001 • OHSAS18001 • REACH
