Product Overview

Industrial Material Handling

This heavy-duty steel cargo trolley is engineered for the efficient transport of mechanical machinery and heavy industrial objects. Designed to work seamlessly with jacks and other lifting tools, it significantly reduces manual labor intensity while enhancing operational efficiency. The robust construction ensures stability and maneuverability, making it an essential tool for warehouses, workshops, and industrial logistics.

Technical Specifications

Key Features

- Robust steel frame construction
- Non-slip rubber pad surface
- Compatible with jacks and lifting tools
- Reduced friction rollers

Wheel Material	PU (Polyurethane)
Wheel Dimensions	80*70
Available Configurations	Conventional, 180-degree Rotating, 360-degree Rotating, Over-obstacle, Hand Crank
