

Heavy-Duty Steel Roll Cage Trolley

This heavy-duty steel roll cage trolley is designed for efficient and secure transportation of goods in warehouses, retail environments, and distribution centers. Constructed from robust steel with a bright zinc plated finish, it offers exceptional durability and corrosion resistance.

Product Overview

Industrial Storage and Logistics Solution

This heavy-duty steel roll cage trolley is engineered for the secure and efficient transport of goods within warehouse, distribution, and retail environments. Constructed from robust steel with a bright zinc-plated finish, it ensures long-term durability and resistance against corrosion. The fully enclosed design features hinged gates for streamlined loading and unloading, while high-quality castors guarantee smooth mobility and workplace safety.

Technical Specifications

Material Finish

Robust Steel • Bright Zinc Plated

Model Identifier

TC4623

Key Features

Mobility & Safety

- High-quality swivel castors
- Integrated wheel braking system
- Fully enclosed cage structure
- Hinged gates for easy access

Recommended Usage

Warehousing, Retail Environments, Distribution Centers
