

Heavy-Duty Steel Truck Wheel Rim

This heavy-duty steel wheel rim is designed for trucks and commercial vehicles. It features a multi-hole pattern for secure mounting and robust construction for durability.

Product Overview

Industrial-Grade Steel Construction

This heavy-duty steel wheel rim is specifically engineered for trucks and commercial vehicles operating under demanding conditions. Built for superior load-bearing capacity and resistance to deformation, the rim ensures long-term reliability and structural integrity. Its unfinished surface provides the flexibility required for custom finishing, such as painting or powder coating, to suit specific operational needs.

Technical Specifications

Surface Finish

Unfinished • Customizable

Material

Steel

Mounting Pattern

Multi-hole pattern

Key Features

Performance Attributes

Heavy-duty, Load-bearing, Deformation-resistant, Commercial-grade
