

Heavy-Duty Steel Truck Wheel

This is a high-strength steel wheel designed for heavy-duty applications. It features a durable construction for enhanced load-bearing capacity and resistance to deformation.

Product Overview

Heavy-Duty Steel Truck Wheel

This high-density, heavy-duty steel wheel is engineered for superior load-bearing capacity and structural integrity. Designed to minimize air leakage and maximize heat dissipation, this component helps extend tire lifespan and maintain optimal performance. Its precision construction ensures excellent balancing, effectively reducing tire abrasion and enhancing overall driving stability for commercial vehicles, trucks, and trailers.

Technical Specifications

Wheel Size	22.5 x 9.00
Bolt Pattern	475

Key Features

Performance Benefits	High Load Capacity, Heat Dissipation, Air-Leak Resistant, Improved Stability, Corrosion Resistant
----------------------	---

Compatibility

Application Scope

- Heavy-Duty Trucks
- Commercial Vehicles
- Trailers
