Product Overview

Industrial Welding Hinges

These heavy-duty welding hinges are engineered for robust, permanent installation on metal gates and doors. Featuring a durable barrel design, they provide smooth operation and exceptional strength under demanding conditions. The series is available in various sizes and configurations, including adjustable options to ensure precise alignment and secure performance in any industrial or commercial setting.

Technical Features

Suitable Applications	Industrial, Commercial, Residential, Metal Gate Installations, Metal Door Installations
Installation Type	Direct Welding

Design and Performance

Performance Attributes

- High load-bearing capacity
- Permanent connection integrity
- Smooth rotational operation
- Precision alignment capability

Configuration Options

Multiple Sizes • Adjustable Models

Design Style	Barrel hinge
