

Heavy-Duty Steel Wheel Rim

Durable steel rim designed for heavy-duty applications. It features robust construction for optimal performance and longevity.

Product Overview

Heavy-Duty Steel Wheel Rim

This heavy-duty steel wheel rim is engineered to deliver exceptional durability and long-term performance in demanding environments. Its robust construction provides reliable support for a wide range of industrial and commercial vehicles. Designed to withstand harsh operational conditions, it ensures consistent reliability and safety for professional heavy-duty applications.

Technical Specifications

Construction Features

- Reinforced structural integrity
- Corrosion-resistant steel base
- Designed for high load-bearing capacity

Material	High-strength industrial steel
Application Scope	Industrial Vehicles, Commercial Vehicles, Heavy-Duty Transport
