

Heavy-Duty Tire Dolly with Swivel Casters

This heavy-duty tire dolly is designed for easy maneuvering of tires and wheels. It features swivel casters for smooth movement and a central recessed area to securely hold tires.

Product Overview

Professional Tire Management Solution

This heavy-duty tire dolly is engineered for high-impact durability using reinforced, injection-molded polypropylene. Designed for automotive workshops and warehouses, it offers exceptional maneuverability with a 360-degree range of motion. The central storage compartment keeps essential tire accessories organized, while the robust frame ensures reliable transport for up to 8 tires.
