

Heavy-Duty Track Bolt for Secure Fastening

This track bolt is designed for secure fastening in demanding environments. It features robust construction with precisely machined threads for optimal grip and durability.

Product Overview

Industrial Strength Fastening

These heavy-duty track bolts are engineered for secure fastening in the most demanding industrial and earthmoving applications. Featuring robust construction and precisely machined threads, they provide optimal grip and superior torque resistance. Designed for heavy equipment, these components ensure reliable, long-lasting connections under high-stress conditions.

Technical Specifications

Recommended Applications

- Heavy Equipment
- Earthmoving Machinery
- Automotive
- Construction
- General Industrial

Tensile Strength Class

Class 10.9, Class 12.9
