Product Overview

Heavy-Duty Trailer Landing Gear

This heavy-duty landing gear is engineered for semi-trailers, providing essential stability during loading, unloading, and parking operations. Built for demanding logistics environments, it features robust steel construction and a smooth-operating crank handle for precise height adjustment. With a focus on durability and corrosion resistance, these landing legs ensure secure placement across various ground conditions.

Key Performance Metrics

Annual Production Capacity

60000 pairs
Annual Output

Lead Time

15-25 days (one full container in one week)

Quality & Compliance

Quality Assurance

- 100% quality checking
- Quality claim rate less than 3‰
- Professional lab testing and research

Certifications

ISO 9001:2008, USA AAR Standard

Service & Warranty

Warranty Period

15 months

Industry Experience

17 years

Product Features

Technical Features

- Robust steel construction
- Smooth operating crank handle
- Durable foot pads
- Corrosion-resistant black finish
