

Heavy-Duty Transmission Jack

This heavy-duty transmission jack is designed for removing, installing, and transporting transmissions, transfer cases, and differentials on a wide range of vehicles. It features a fully adjustable saddle, wide base, smooth-rolling casters, and a safety overload system.

Overview

Professional Grade Transmission Handling

This heavy-duty transmission jack is engineered for the seamless removal, installation, and transport of transmissions, transfer cases, and differentials across a broad range of vehicle types. Built with high-strength steel, it provides exceptional durability and stability in demanding automotive shop environments. The inclusion of a precision-adjustable saddle and a controlled hydraulic system ensures efficient and safe operation for professional technicians.

Performance & Safety

Safety Features	Safety Overload System, Hydraulic Control
Saddle Precision	Fully adjustable with multiple degrees of freedom for alignment

Design & Construction

Mobility

- Wide base for stability
- Smooth-rolling casters

Material	High-strength steel
