

Heavy-Duty Truck Bogie with Six Spoke Axle

This bogie is available in 24T, 28T, 32T, and 36T configurations. It features a six-spoke axle for enhanced load distribution and stability.

Overview

Heavy-Duty Bogie Suspension System

This heavy-duty bogie suspension system is engineered for demanding truck and trailer applications, providing exceptional load distribution and stability. Featuring a robust six-spoke axle design, it is built to withstand rigorous off-road and heavy haulage operations. With multiple capacity options and customizable configurations, this system ensures reliable performance and durability under significant stress.
