

# Heavy-Duty Truck Rear Axle Assembly

This heavy-duty truck rear axle assembly is designed for robust performance and durability in commercial vehicle applications. It features a central differential housing, brake assemblies, and wheel hubs engineered to withstand high torque and load capacities.

## Product Overview

### Robust Rear Axle Assembly

This heavy-duty rear axle assembly is engineered for demanding commercial vehicle applications, providing exceptional durability and performance. Designed to handle high torque and significant load capacities, it features an integrated central differential housing, comprehensive brake assemblies, and reinforced wheel hubs. Its high-strength material construction ensures an extended service life and reliable operation in challenging work environments.

## Technical Specifications

### Key Features

- Central differential housing
- Integrated brake assemblies
- High-strength material construction
- Heavy-duty wheel hub design
