

Heavy-Duty Truck Steering Axle Assembly

Heavy-duty steering axle assembly designed for commercial vehicles. It includes brake chambers, steering knuckles, tie rod, and associated hardware for reliable steering and braking performance.

Product Overview

Heavy-Duty Truck Steering Axle Assembly

This heavy-duty steering axle assembly is engineered for demanding commercial vehicle applications, offering a robust construction designed for durability and precise handling. Featuring an integrated steering cylinder and high-capacity performance, this unit ensures reliable operation in challenging conditions. The assembly comes complete with essential braking and steering components, providing a professional-grade solution for vehicle maintenance and upgrades.

Performance Metrics

Load Capacity

12000 KG

Max Capacity

Technical Specifications

Axle Beam Length	2040 mm
Axle Beam Profile	127mm Round
Maximum Steering Angle	10 degrees

Braking & Steering

Brake Dimensions	406 * 120 mm
Steering Configuration	Single chamber cylinder

Component Details

Bearing Model	33214, 33217
Wheel Stud Specification	10 * M22 * 1.5
