

Heavy-Duty Vehicle Brake Linings

These brake linings are designed for heavy-duty vehicles. They offer superior friction and heat resistance, ensuring reliable stopping power.

Product Overview

High-Performance Braking Solutions

These heavy-duty vehicle brake linings are engineered for superior friction and heat resistance, delivering reliable stopping power even under the most demanding operating conditions. Designed specifically for trucks, buses, and other heavy-duty applications, these components feature high-precision manufacturing to ensure consistent performance. By utilizing high-quality materials, they offer extended service life and significantly reduced brake fade, making them an ideal choice for professional fleet maintenance and heavy-duty transport operations.

Technical Specifications

Key Performance Characteristics

- Superior friction coefficient
- High heat resistance
- Reduced brake fade
- Extended service life

Durability Certification

Heavy-Duty Grade • High-Performance

Compatible Vehicles

Trucks, Buses, Heavy-Duty Vehicles
