

Heavy-Duty Vehicle Tow Rope with Steel Hooks

This heavy-duty tow rope is made with durable synthetic fibers for reliable towing. It is equipped with reinforced steel hooks with safety latches for secure attachment.

Product Overview

Professional Towing Solutions

This heavy-duty vehicle tow rope is engineered for reliability in recovery and towing operations. Featuring a robust combination of polypropylene and polyethylene fibers, the rope offers high durability and resistance to abrasion. It comes equipped with heat-treated steel hooks and integrated safety latches to ensure a secure, high-strength connection during use.

Technical Specifications

Maximum Pull Force

1100 kg
Max Load

Material Composition

- Polypropylene (PP)
- Polyethylene (PE)
- Heat-Treated Steel

Rope Length

4 m

Compliance & Quality

Certifications

CE, GS
