

Heavy-Duty Welding Machine with Adjustable Settings

This heavy-duty welding machine is suitable for various welding applications. It features adjustable settings, durable construction, and portability with wheels, and is designed for industrial use with AC and DC output capabilities.

Overview

Industrial Welding Performance

This heavy-duty welding machine is engineered for versatile industrial applications requiring both AC and DC output capabilities. Designed for durability and ease of mobility, the unit includes integrated wheels for site portability. Its adjustable settings provide professional operators with precise control for various welding tasks.

Technical Specifications

Build Quality

Heavy-Duty • Industrial Grade

Model Designation

ZXE-500/400

Current Output

AC, DC

Features

Mobility

Yes

Control Settings

Fully adjustable settings for varying welding requirements
