

Heavy-Duty Wheel Loader

This wheel loader is a robust construction machine designed for heavy-duty material handling. It delivers high torque for efficient digging and loading with its powerful engine and ensures smooth, precise control using its hydraulic system.

Overview

Heavy-Duty Performance

The ZL50C wheel loader is a robust construction machine engineered for demanding material handling tasks. It features a powerful engine delivering high torque for efficient digging and loading operations in construction sites and quarries. Designed for reliability, its durable components ensure minimal downtime, while the ergonomic cabin prioritizes operator comfort and safety.

Performance Metrics

Suitable Applications

- Construction Sites
- Quarries
- Material Handling

Machine Type	Wheel Loader
Key Features	High Torque, Heavy-Duty, Precise Hydraulics, Ergonomic Cabin
