Overview

High-Performance Heavy-Duty Wheel Loader

This heavy-duty wheel loader is engineered for demanding applications in construction, mining, and agriculture. It features a robust hydraulic system for powerful lifting and digging, alongside a high-torque engine for efficient material handling. With an ergonomic cabin design that prioritizes operator comfort and visibility, this machine ensures high productivity and safety across various terrains.

Key Features

Engineering Highlights

- Auto Cooling Technology on brake system for enhanced safety
- Dust-proof layer and sealed articulated points for increased durability
- Bigger hinge pin and hinge bearing for higher carrying capacity
- Confluence of double pumps and equivalent unloading hydraulic systems for energy efficiency
- Independent transmission oil and hydraulic oil cooling for system stability

Cabin & Control

Broad view cabin, Single/Double-handle pilot control, Electronic control gearshift, Humanized design

Compatibility

Available Attachments

Floating forks • Tire chain • Log grapple • Block fork • Snow blade • Grass fork • Enlarged bucket • Teeth

Compliance & Support

Warranty Terms

1 Year

Warranty Period (Years)

2000 Hours

Warranty Limit (Working Hours)

Certifications

ISO 9001:2008, CE, EPA compliant
