Overview

Heavy-Duty 5-Ton Wheel Loader

This 5-ton capacity wheel loader is engineered for demanding tasks in construction, mining, and material handling environments. It incorporates proprietary technologies, such as an auto-cooling brake system and dust-proof axle layers, to maximize durability and operational safety. With a focus on efficiency, the machine utilizes a dual-pump hydraulic system and offers a spacious, ergonomic cabin for superior operator comfort and visibility.

Technical Specifications

Rated Load Capacity	5 ton
Hydraulic System	Dual pump confluence with equivalent unloading
Cooling System	Independent transmission and hydraulic oil cooling

Design & Features

Key Features

- Auto Cooling Technology on brake system
- Dust-proof axle layer
- Electronic control gearshift
- Single/Double-handle pilot control

Certifications	ISO 9001:2008, CE, EPA
----------------	------------------------

Attachments

Optional Attachments

Floating forks • Tire chain • Log grapple • Block fork • Snow blade • Grass fork • Enlarged bucket

Warranty & Support

Warranty Period

1 year or 2000 working hours (whichever occurs first)
