

Heavy-Duty Wheel Loader for Construction

This heavy-duty wheel loader is designed for earthmoving and material handling. It features large tires and a protective radiator grill for demanding construction environments.

Overview

Heavy-Duty Construction Performance

This heavy-duty wheel loader is engineered specifically for demanding construction environments, focusing on high-capacity earthmoving and material handling. Featuring a robust front-end loader assembly and large, durable tires, it provides the traction and lifting power necessary for industrial-scale tasks. Its structural design includes a protective radiator grill to ensure longevity and reliability during extensive use in rugged field conditions.

Key Features

Primary Application	Earthmoving, Material Handling, Construction, Industrial
---------------------	--

Technical Specs

Design Highlights

- Robust front-end loader assembly
- High-traction large tires
- Protective radiator grill

Equipment Category	Heavy-Duty Wheel Loader
