

Heavy-Duty Wheel Loader for Mineral Handling

This wheel loader is designed for mineral extraction and construction applications. It features a robust chassis, powerful hydraulic system, and high-capacity bucket for efficient material handling.

Overview

Heavy-Duty Mineral Handling Solution

This heavy-duty wheel loader is engineered specifically for demanding mineral extraction and construction environments. It features a robust chassis and a powerful hydraulic system designed to maximize efficiency during loading, transporting, and stockpiling bulk materials. With a focus on operator well-being, the machine includes a comfortable cabin and advanced safety features to ensure high productivity throughout the workday.

Key Performance Metrics

Core Features

- Robust chassis construction
- High-capacity bucket
- Powerful hydraulic system
- Advanced operator safety suite

Operational Focus

High Efficiency • Operator Comfort • Heavy-Duty

Primary Application

Mineral Extraction, Construction, Material Handling, Stockpiling
